What is your overall opinion about this course?

11 Excellent

5 Good

3 Satisfactory

Poor

Very poor

Please note your most positive experiences:

- I got information.
- I spend a really good time all over the period of the course.
- "Team work"
- We were able to work in a friendly environment, the organisers did a great job in the way they presented to the participants their knowledge and experience. And to the question of one of the facilitators/trainers "Am I happy now?" - Yes I am.
- The 1st day team building, the final project presentation.
- To learn to make a project, work in group.
- Work group, new friendship, collaboration between countries.
- Work in group.
- The DRR international terms, exchange of opinions, ideas and experience with other DPPI countries.
- Positive spirit, work group...
- All the participants showed an exceptional level of involvement in their subject, commitment to the task.
- Connect each other.
- I feel good here. I liked very much this training. It was a good practice and I think will help all of us in our jobs.

Please note the most negative experiences, if any or what can be improved on:

- I wouldn't say I had negative experiences, some of the things regarding group/team work could be better, but it always depends on the people so in the end it's just a course.
- Nothing that I can think of at the moment.
- The programme of the course was long time per day.
- More practical work or less theory because it's too much information little bit confusing, long lasting, people get tired, more time to rest!!!

- The course needs to be further developed (less facilitators to be involved)
- It supposed to improve our knowledge not to make everything perfect and to be judge.
- Can change sometimes group to give all opportunity to speak, to motivate the others that are shy to speak

Finally, please add any other comment/suggestion/recommendation that could be useful to improve the course:

- To improve personal networking organiser should organise 2nd course with same participants.
- Useful information but in a short period of time.
- The course was excellent but long-lasting one.
- The course can be more a couple days.
- Making presentation learnt.
- More days to learn how to make project.
- It was good in here
