

EU Full Scale Exercise “ResponSEE”

Project presentation

ResponSEE - Project Nr. 101017985

Project Consortium:

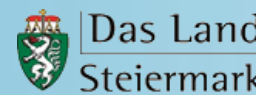

Associated beneficiaries: Civil Protection of ALBANIA

and Montenegro

Subcontractors:

General project overview

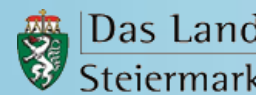

Aim:

Strengthen disaster preparedness in the Western Balkans to bring ALB and BiH closer to the UCPM (increase interoperability, enable internat. cooperation)

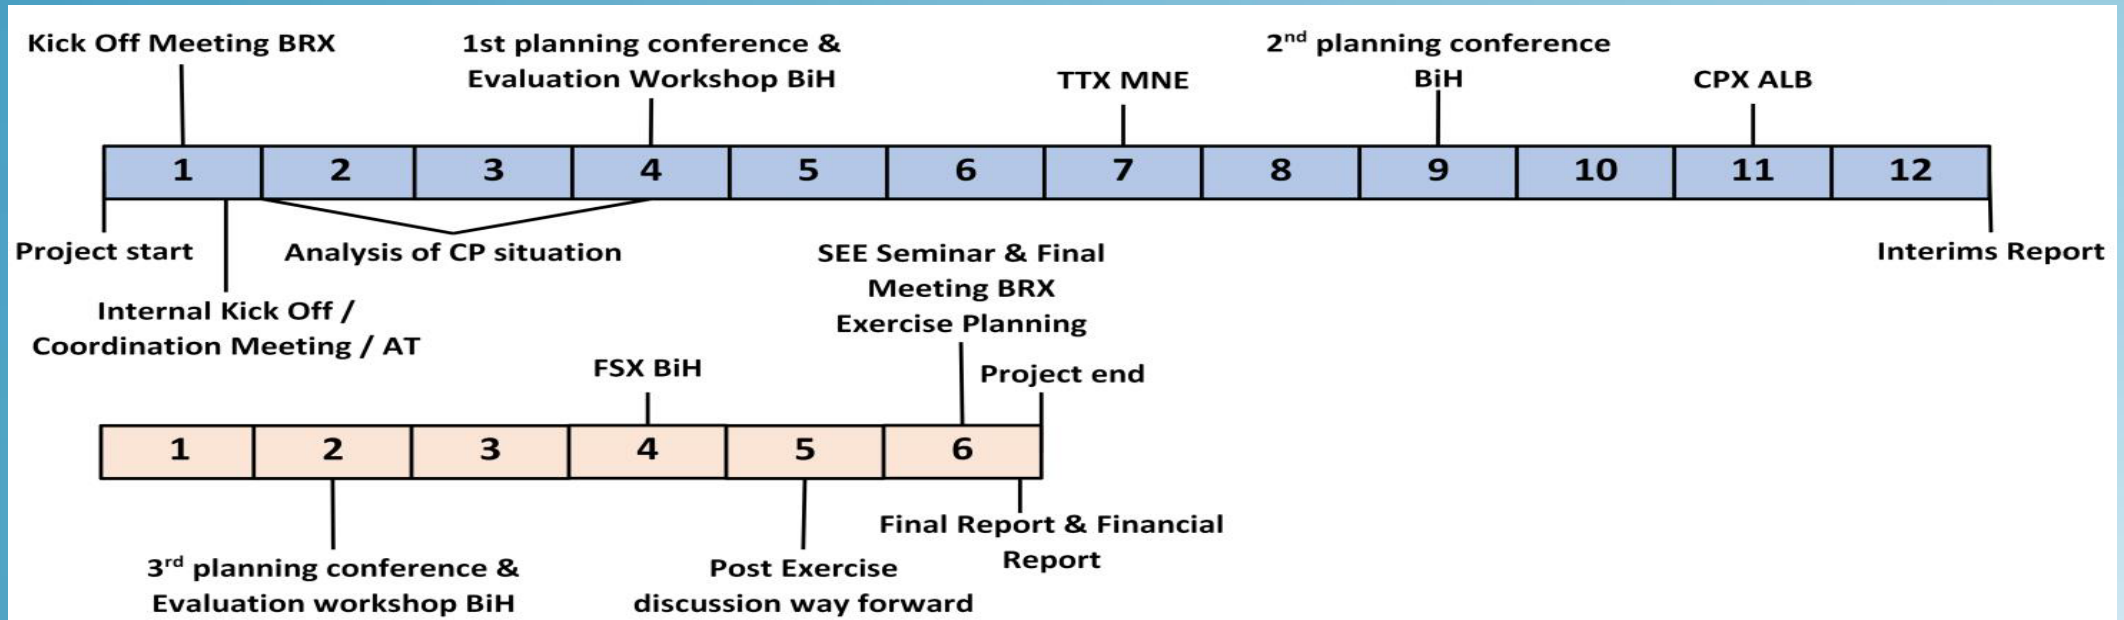

Objectives:

- 1. In depth analysis CP situation in Alb, BiH, MNE
- 2. Joint planning with partners
- 3. Development of an exercise planning guide
- 4. Prepare and conduct one TTX in MNE (July 2021)
- 5. Prepare and conduct one CPX in ALB (Nov 2021)
- 6. Prepare and conduct one FSX in BiH (April 2022)
- 7. Evaluation, Lessons Learned & Way Ahead

Problem: COVID 19!!

Anticipated dates

Methodology:

„From the simple to the complicated“

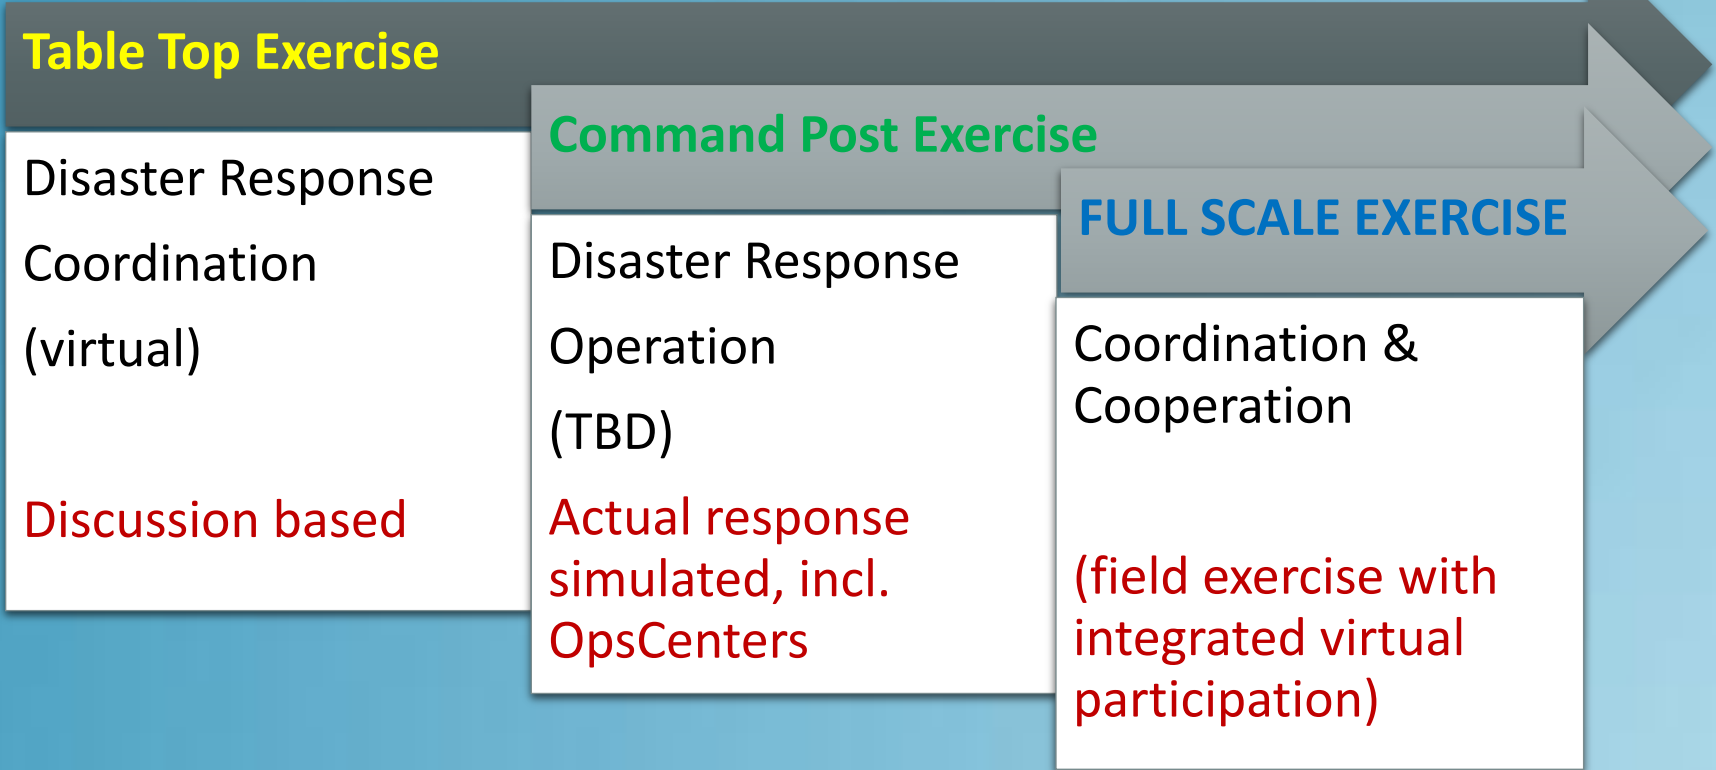

Scenario and possible participants involved

- ❖ Earthquake in the region of Sarajevo/BiH and later one in Albania with cascading effects including pandemic

- ❖ Whole mission cycle with specific focus on inclusion of the HNS guidelines and issues related to People With Specific Needs(PWSN) and CMCoord.
 - First teams in the region from BiH, Alb, MNE deployed (RDC – Port of Kotor/MNE)
 - Assessment of situation & Definition of needs
 - Use of CECIS(Common Emergency Communication and Information System)
 - Joint EUCP/UNDAC Team + TAST arrival at Sarajevo airport
 - Set up of RDC, OSOCC, BoO
 - Additional 4 EU CP skeleton teams;
 - 10 Observers;
 - Local/Nat./International Organisations plus private sector (UN OCHA, EU Delegation, EUFOR ALTHEA, IOM, NATO EADRCC, DPPI SEE..)

ORGANIZATIONAL FRAMEWORK

Strengthen disaster preparedness

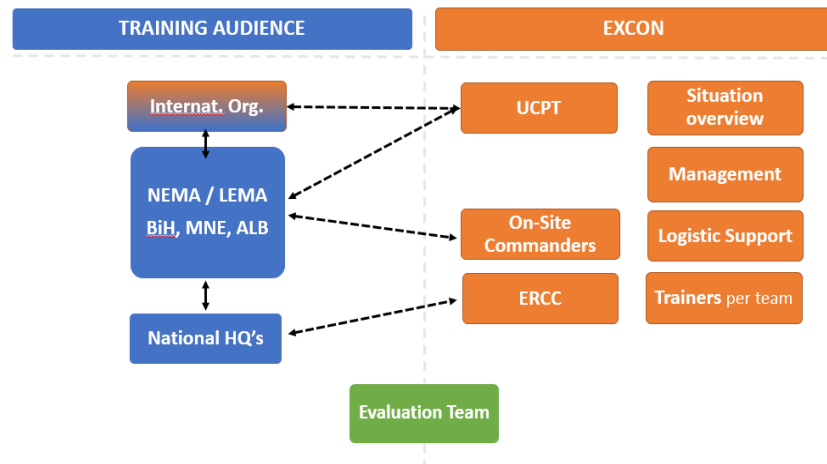

ResponSEE - Project Nr. 101017985

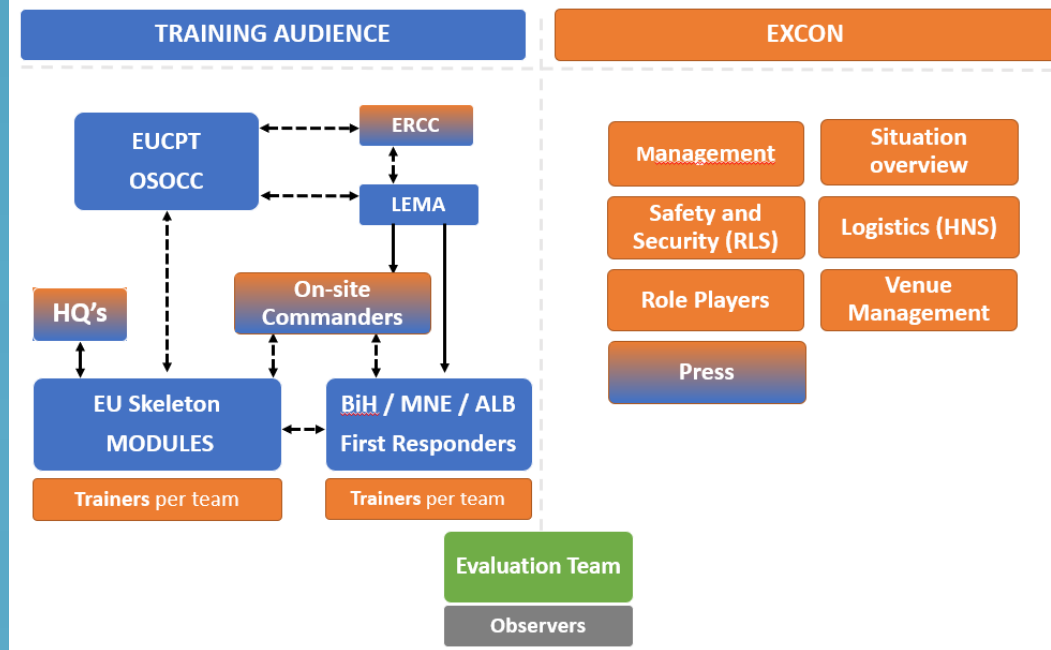

TTX STRUCTURE

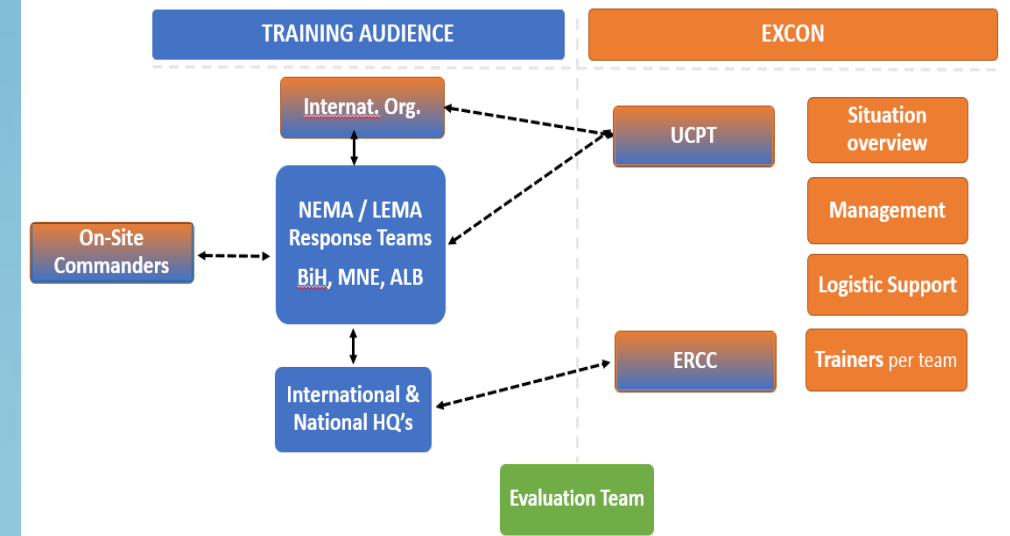

Discussion based

FSX STRUCTURE

An operations-based exercise 36 hrs

CPX STRUCTURE

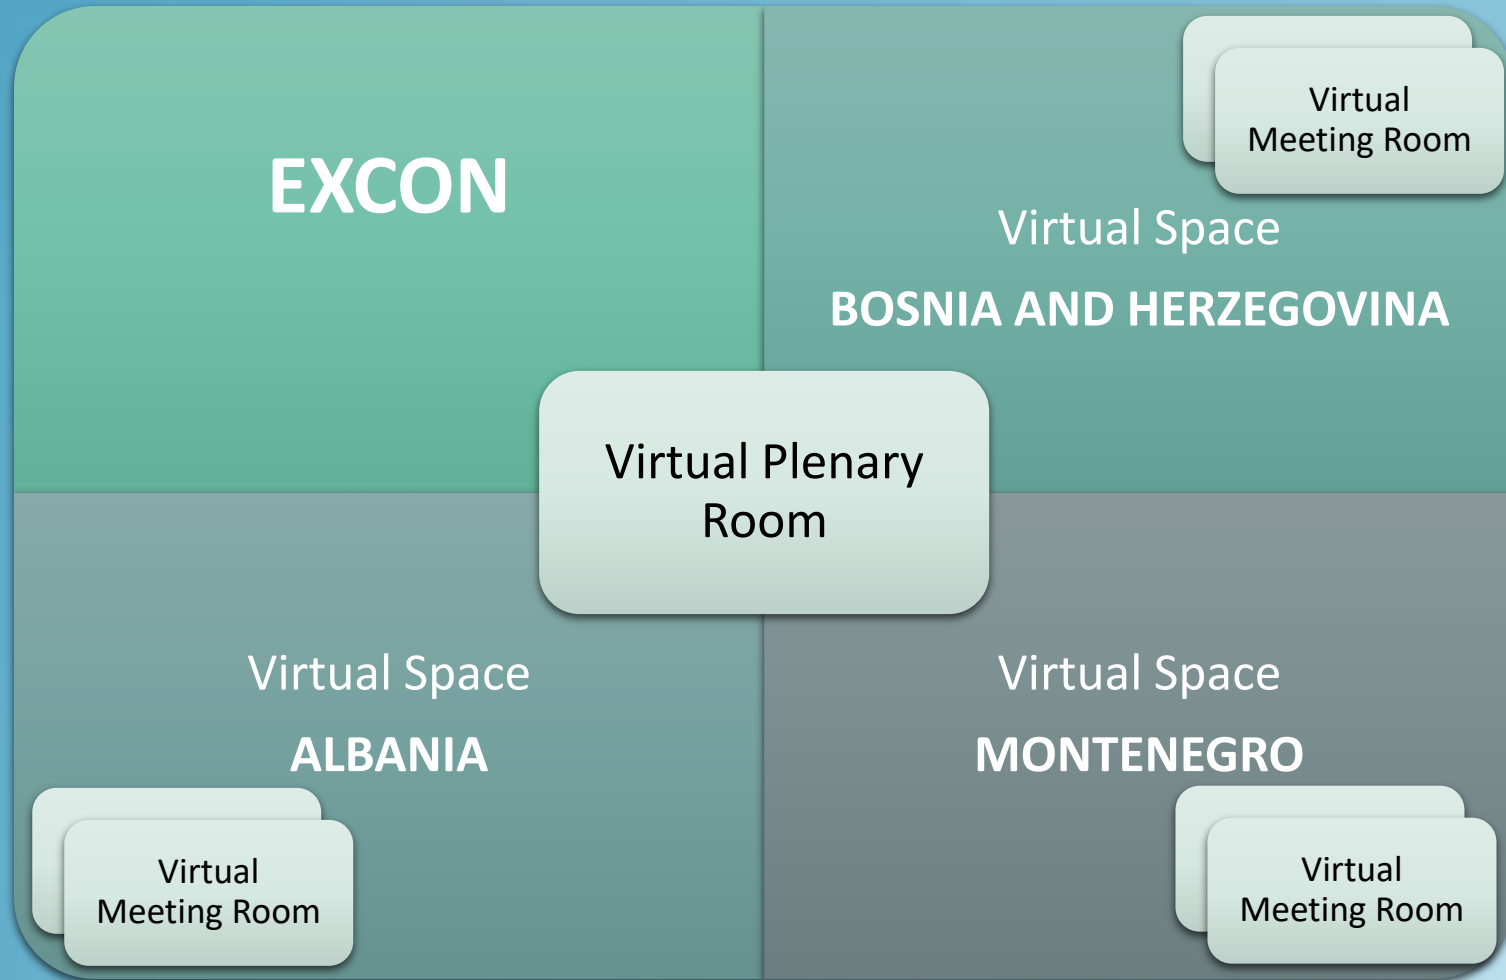

Actual response simulated, incl. OpsCenters

Table-Top Exercise (ResponSEE-TTX)

- Situation & Overview
- Inject Cell (MEL/MIL)
- Role Playing (UCPT, Response Teams, Internat. Org., gaps)
- Trainer Staff Coordination (Main Trainer)

- Internat. Org. (TBD)

- Internat. Org. (TBD)

- Internat. Org. (TBD)

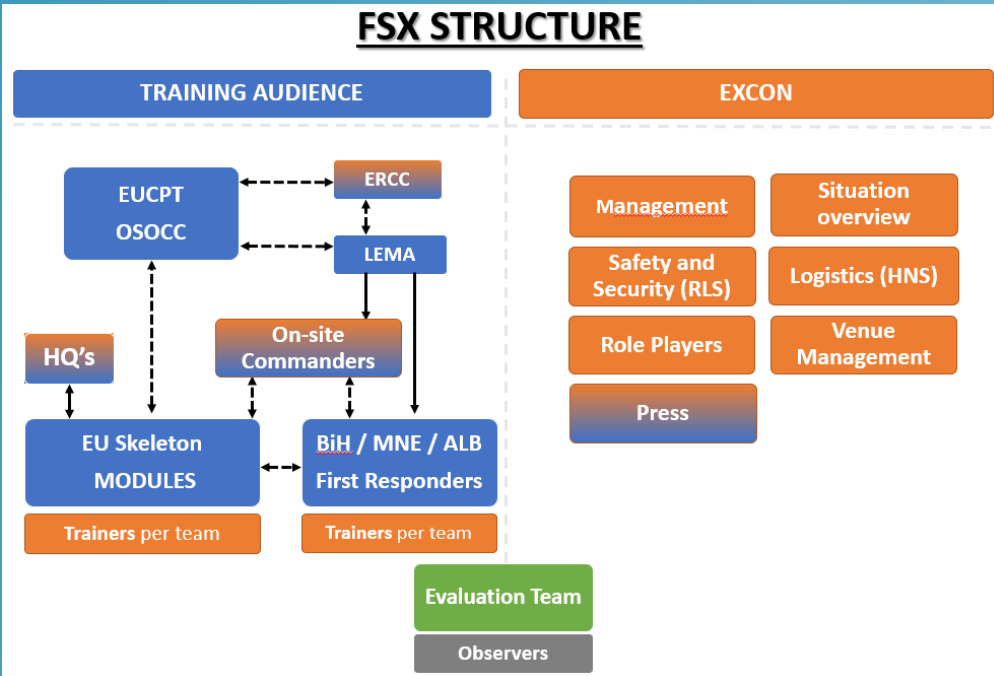

For CPX: Plus ERCC/UN&EU, Operations Centers and TL/DTL of Teams

Full Scale Exercise (FSX)

FSX STRUCTURE

- „Boots on the ground“
- Ev. smaller teams/Skeleton teams
- Training only within negative tested teams
- Ev. more sites, less joint rescue operations
- Use of „dummies“ instead of real persons
- OSOCC etc. in larger tents/halls
- Online Meetings (EUCPT, USAR LO's, TL, IO,..)

FSX and the future under pandemic situations

- Mixture of virtual and field exercise – e.g. virtual OSOCC/EXCON
- Troops train/dig in their own countries but are linked to a joint map (e.g. USAR sector A in BiH, B in MNE etc. – but use 1 scenario & 1 map!
- Extra trainers at each site, extra costs for additional sites, use of drones for assessment and evaluate working progress
- Mixture of full teams and skelton teams on site!
- Virtual Meetings (EUCPT, some assessments, coordination meetings etc...)
- High standards for pandemic prevention measures to be followed (Tests, disinfection, only same persons of one team at the same site operating)

Although we have to face limitations – we have to live with them as emergencies to not care about pandemics!

ResponSEE - Project Nr. 101017985

Thanks a lot for your attention!

Any questions?
